Professional Summary

Senior Frontend Developer with over 7 years of experience building modern web applications. Specializing in TypeScript, React, and Next.js. I've worked on a diverse range of projects, including performance monitoring systems, marketplace platforms, fleet management solutions, and enterprise market research applications.

Work Experience

Senior Software Engineer - Swvl, Remote

DEC 2021 - PRESENT

- Designed and developed the Swvl Cloud platform web app to manage daily ride operations in 135 cities and 20 countries
- Architected the frontend app using micro-frontend patterns
- Re-written a reusable components library from scratch
- Developed core modules for the Partners Portal

Software Engineer - Frontend - Motive, Remote

AUG 2020 - DEC 2021

- Developed the MVP for Smart Load Board, a B2B freight marketplace
- Connected over 1k shippers with more than 100k loads every month
- Helped Motive sign a strategic partnership with the largest trucking company
- Implemented real-time load tracking features using WebSockets

Senior Software Engineer - Northbay Solutions, Lahore

MAR 2019 - JUL 2020

Intelligize: Contributed to the complete rewrite of a leading compliance management platform serving 100,000+ active users. Key contributions:

- Developed the SEC Filings frontend application from the ground up
- Improved document-view tab switching performance by 50%
- Enhanced document loading performance by 65% using virtualization
- Implemented advanced search functionality with complex filtering capabilities
